## 12 Port Layer 2 Managed GigE Super Boost PoE Switch

|                                   |  |
|-----------------------------------|--|
| Category Type:                    | Managed Layer 2                          |
| Mounting Type:                    | 19" Rack Mount, Wall, or Shelf           |
| Power Over Ethernet:              | Super Boost PoE Technology - IEEE802.3at |
| Max Number of Ports:              | 12                                       |
| Gigabit Ethernet Ports:           | 10 dedicated copper GigE ports           |
| 100/1000Tx SFP Ports:             | NA                                       |
| 1000Tx SFP Ports:                 | 2  |
| 1GbE/10GbE SFP+ Ports:            | NA                                       |
| Fixed Fiber Ports:                | None; only SFP-based fiber ports         |
| PoE Ports (30 Watt)(IEEE802.3at): | Yes, all 10 copper ports                 |
| PoE Ports (IEEE802.3bt):          | NA                                       |
| Network Chipset Manufacturer:     | BROADCOM SoC                             |
| Power Input:                      | 12-57 Volts DC (Super Boost PoE Tech)    |
| Hardened Operating Temperature:   | Ext: -40°C ~ 85°C (-40°F ~ 185°F)        |
| NSA Endpoint Security Certified:  | Yes                                      |
| DYMEC Warranty:                   | 5 Year / Limited Lifetime                |
